Architecture Portfolio Checklist

A tighter, better-curated portfolio beats a long one. Use this before you submit.

Curation

- [ ] 3-5 strong projects, best first and best last
- [ ] Quality over quantity - cut weak work
- [ ] A clear story per project: brief, concept, development, resolution
- [ ] Show process (sketches, models), not only final renders

Each project should show

- [ ] A concept / parti diagram
- [ ] Plans, sections and elevations at legible scale
- [ ] At least one good section (proves spatial thinking)
- [ ] One strong hero image
- [ ] A one-line description of your role (if group work)

Layout & craft

- [ ] Consistent grid, type and margins across pages
- [ ] Generous white space - let work breathe
- [ ] Readable text; caption every drawing
- [ ] Consistent line weights and drawing style

Practical

- [ ] Right page count for the application (often 15-30 pages)
- [ ] Digital PDF under any size limit given
- [ ] Print test at least once
- [ ] Proofread - no typos, correct names
